

# PayFlex proudly presents the PayFlex Card!

PayFlex is proud to introduce our PayFlex Card! The card was developed with First Data Corporation, the world's largest processor of debit and credit card transactions. The PayFlex card will replace your current flex card, November 1, 2006!

You will receive your new PayFlex card by mail at your current home address by 11/01/06. If a dependent currently has a flex card, a new PayFlex card will also be issued. New PayFlex participants can request a card for an eligible dependent at [www.mypayflex.com](http://www.mypayflex.com) or by calling your PayFlex Customer Service Representatives after receiving their PayFlex card.

PayFlex intends to make our card “a little smarter” than the current card. At Walgreens stores, the card will recognize only flex-eligible drugs and medicines, eliminating the potential purchase of ineligible items. PayFlex substantiation requests will also be reduced! Other national chains are being asked to participate in this program. Additional user-friendly features are in the works!

Please take time to review the “rules” of the PayFlex card when you receive it. This will help you save time and trouble in the future and increase the enjoyment of this valuable benefit!
